The Problem at Hand

- Employees waste valuable time on manual travel bookings and expense report filing.
- Current systems are not user-friendly and require multiple tools.
- Approval flows are non-intuitive and prone to errors.
- Lack of integration with employee data/context leads to repeated input and delays.

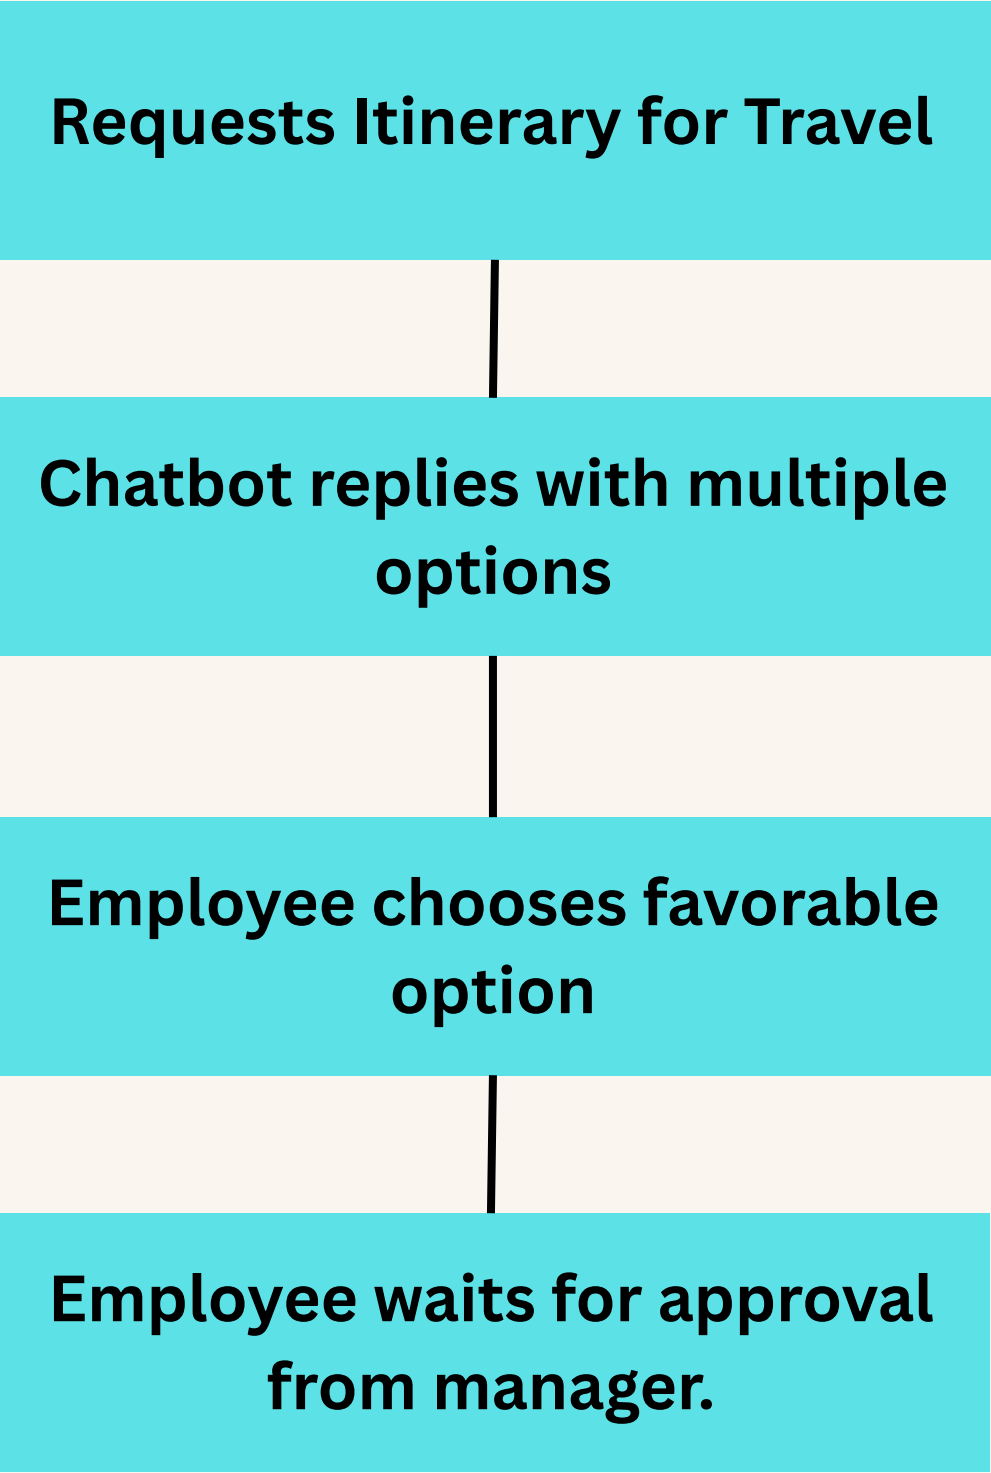

Our Solution

- Conversational interface for itinerary options.
- Uses employee calendar and preferences to auto-fill details.
- Single platform for trip planning, booking, and expense filing.
- Enforces company travel and expense policies.
- Minimizes manual steps, saving time and reducing errors.

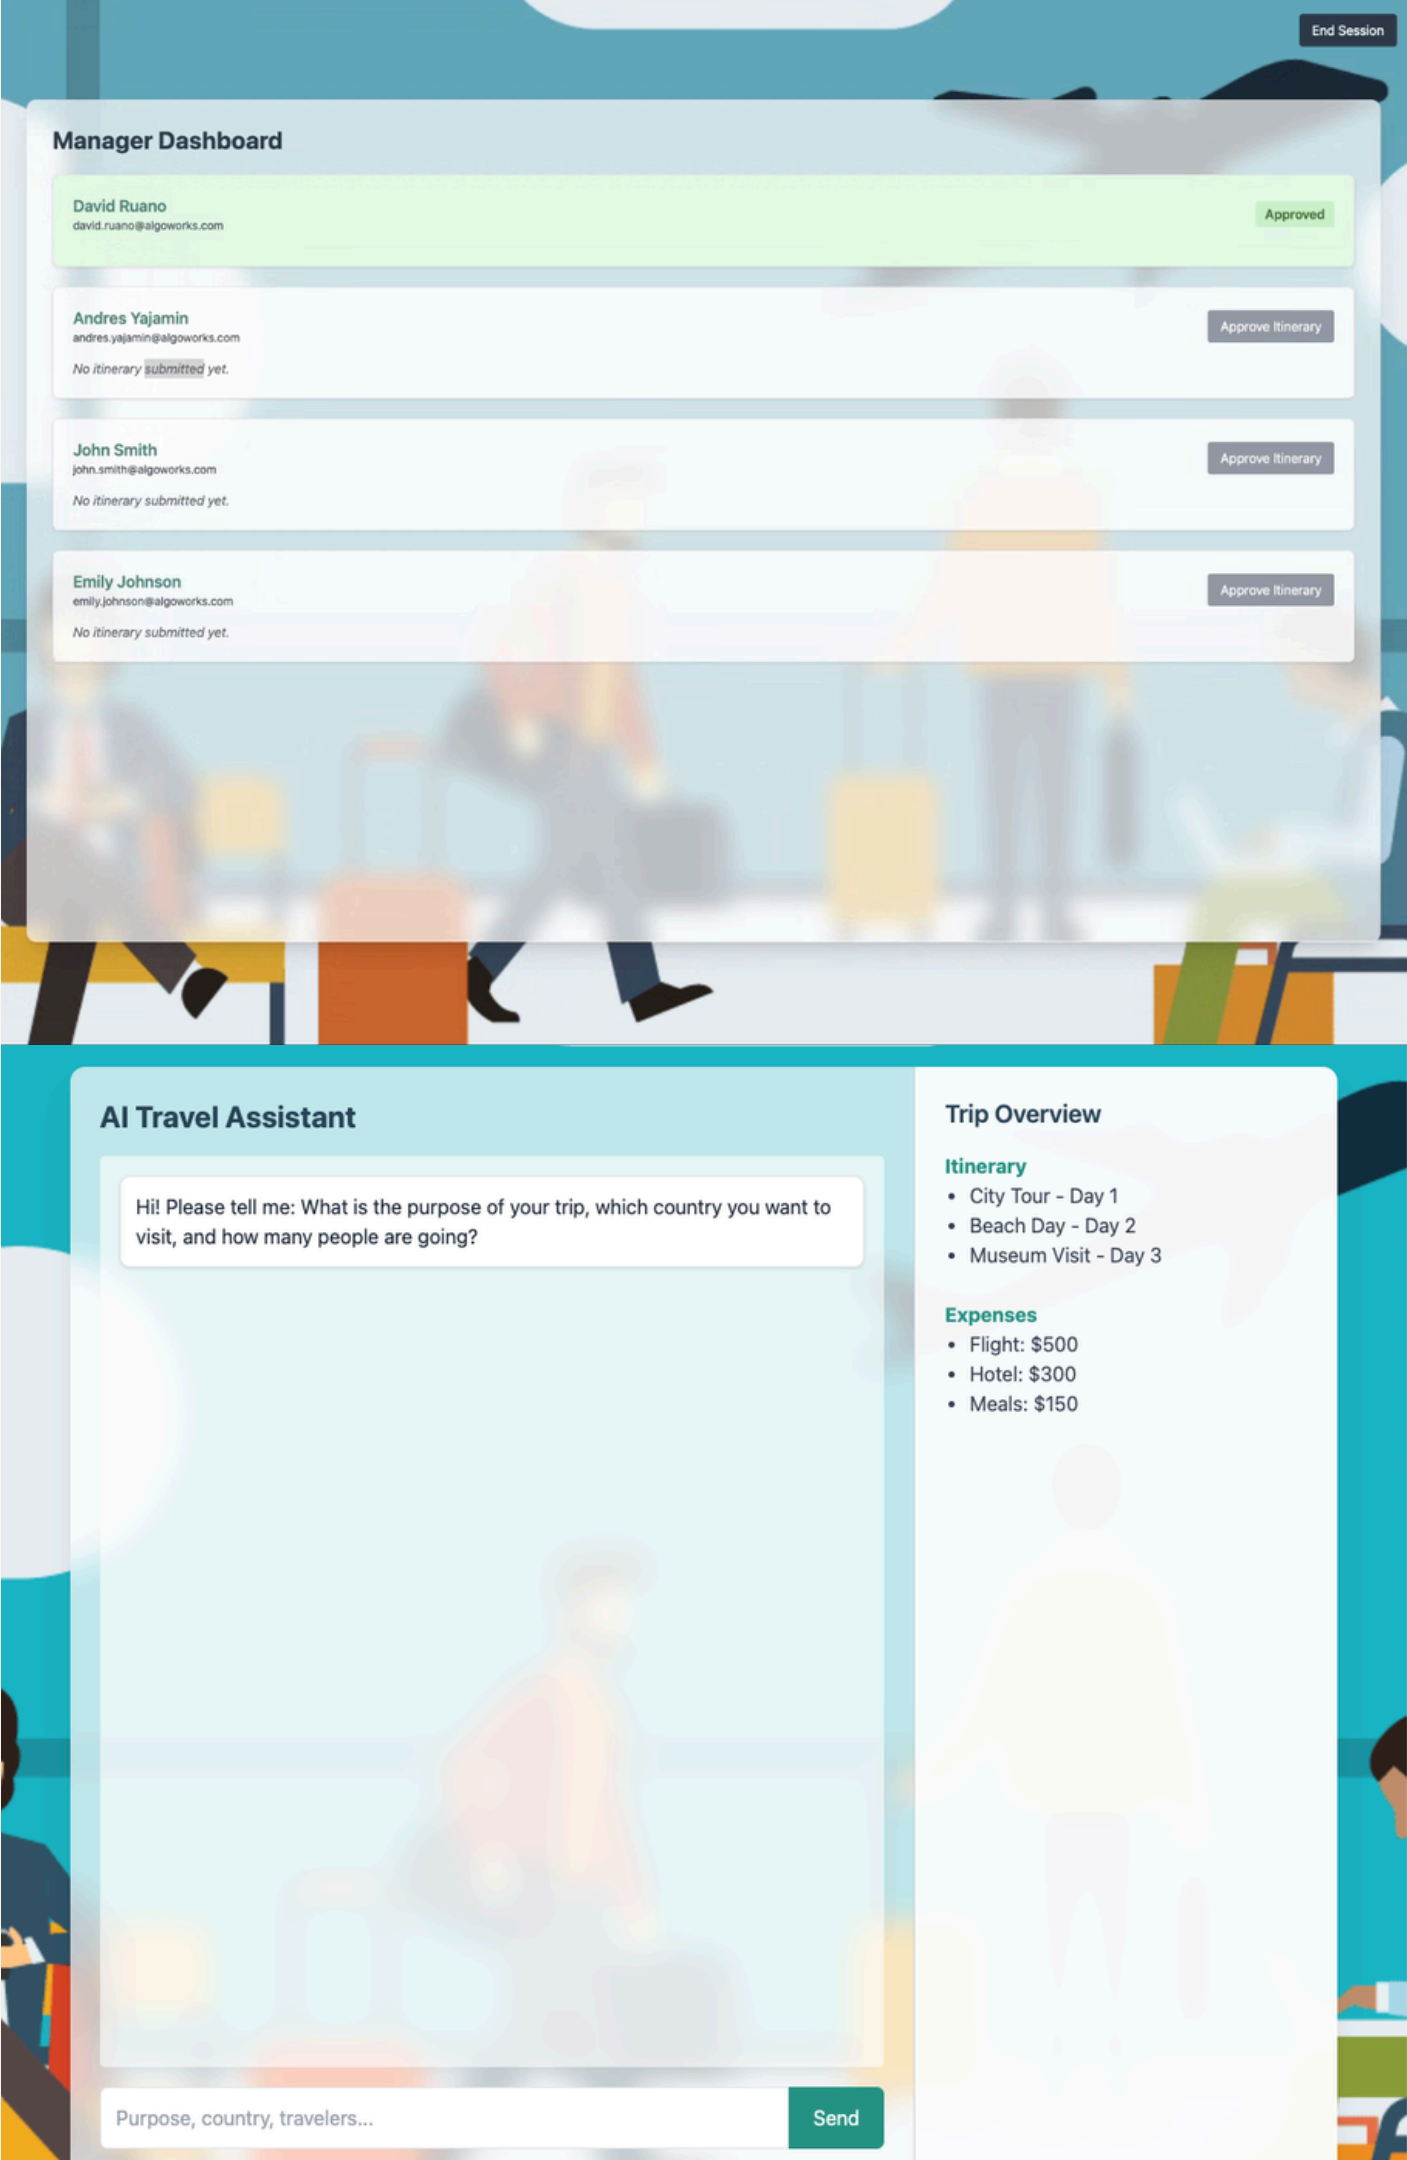

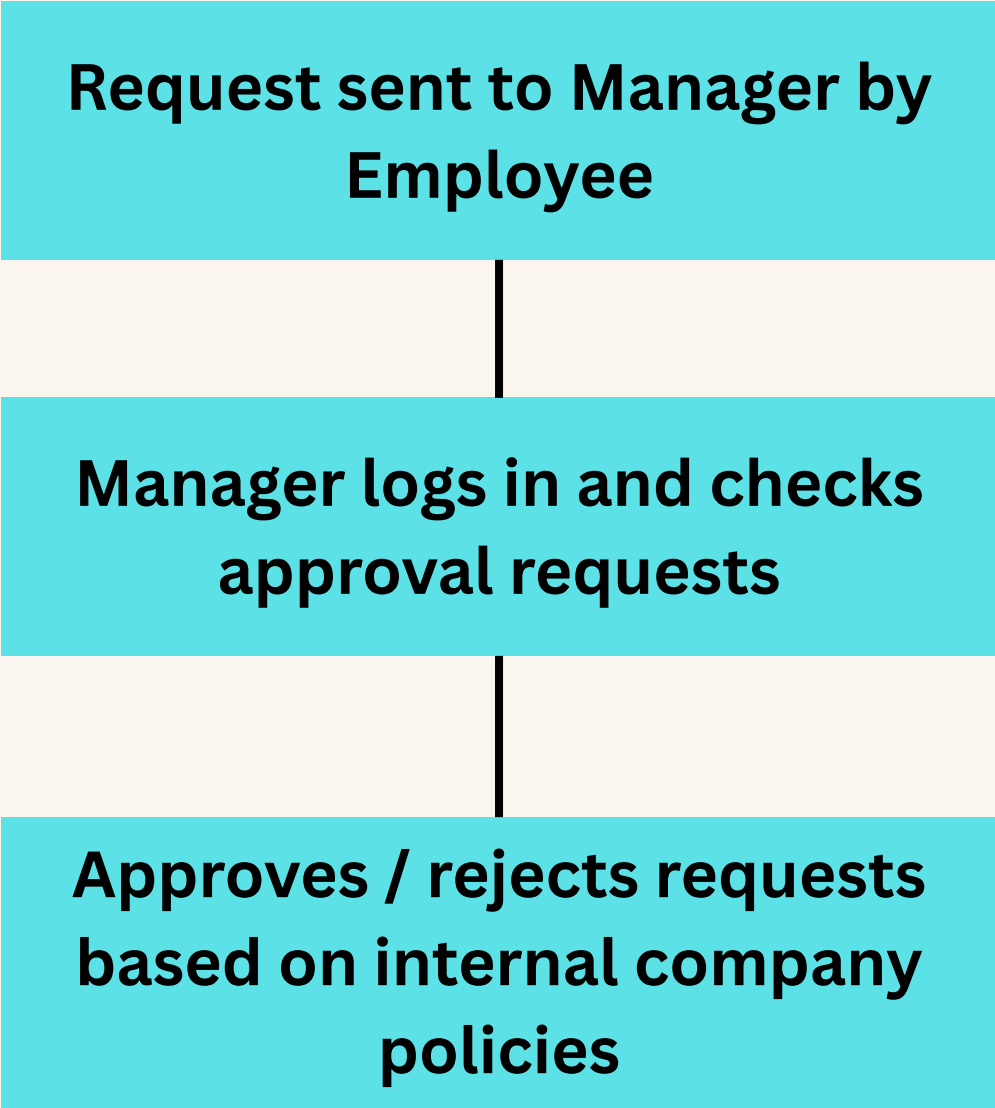

Our Workflow
